ALTERED/MOVED NOTES: Original site. Most of the horse stalls have been removed on the East side but enough evidence remains to show that (5) double and (1) single horse stalls were along the East wall. Two cow stalls remain at the South end on the West side and evidence suggests that there were stalls from the South wall to the North wall. Roof has been covered with steel roofing over the cedar shingles. The walls have been covered with steel roofing and it appears that the siding was removed.

INTERIOR NOTES: Two of the double horse stalls and two of the milk cow stalls are still in place. Two granaries in the center at the North end and a tack room in the center at the South end are still in place. Three rows of 6x6 posts and 6x6 beams run North to South. The East row has (3) 2x6's for a beam. Floor joists are 2x10's.

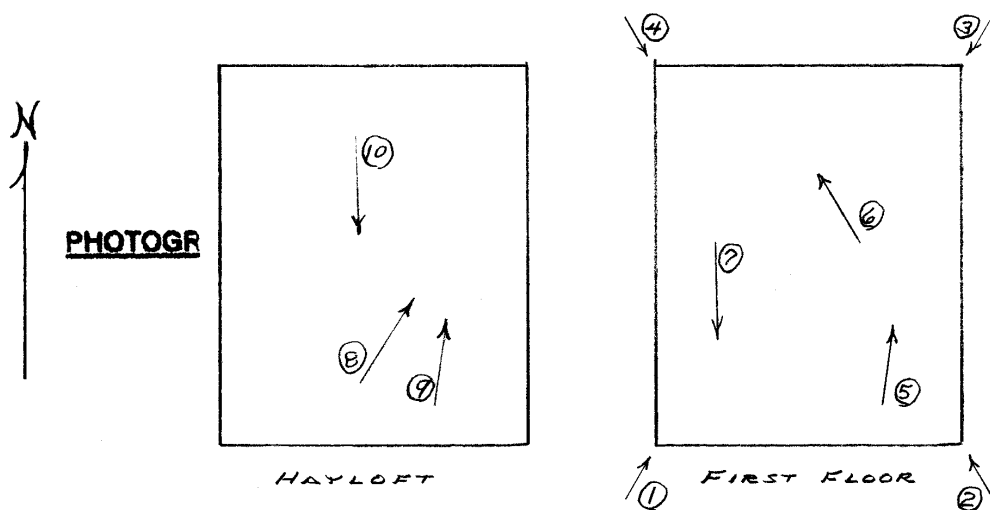

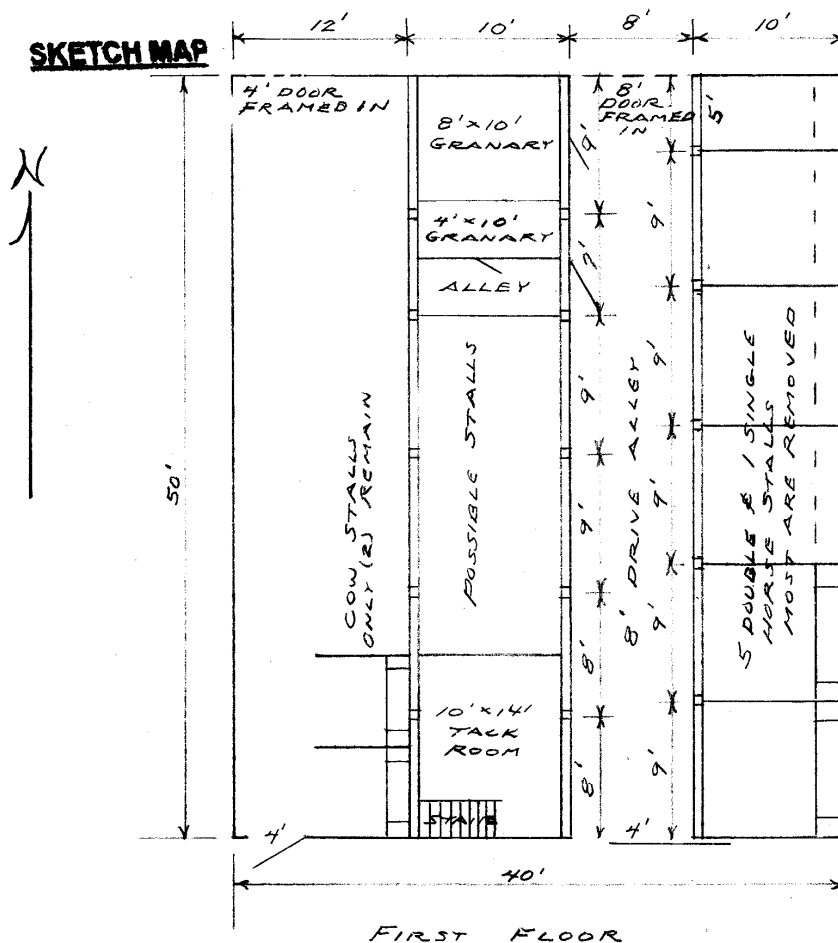

OTHER NOTES: 2x6 stud walls with 1x10 shiplap and steel roofing. Rafters are 2x6's with two rows of 6x6 posts supporting a triple 2x6 plate at the roof hip. Windows are replaced with a 1 light thermo pane in an aluminum frame. They have dividers between the glass to look like 10"x 12" four light windows.

Two windows in the South Wall of the hayloft are taller and have dividers to look like 8 light windows. Metal cupola still on the roof.
